

LIQUID DEFOAMING AND WATER REDUCTING AGENTS

PRODUCT	MAIN USE	pH	FEATURE & ADVANTAGE
HS - DEFOAMER 567	Defoaming agent	3,5 - 4,5	Well-dispersible in water and admixture Excellent defoaming performance with cost-effective Good for high-compressive strength of concrete Clean surface of concrete
PAPO 100	Defoaming agent	8,0 - 11,0	Well dispersible in water and admixture Excellent defoaming performance with cost-effective Good for high-compressive strength of concrete Clean surface of concrete
DEX-566	Defoaming agent	5,6 – 7,6	Eco-friendly in comparison with typical TBP defoamers Good compatibility with PCE base superplasticizers and Ligno base plasticizer Excellent stability for long distance delivery and long time storage Good defoaming performance Good for high-compressive strength of concrete Clean surface of concrete
PLUS TBF	Defoaming agent	5,0 – 8,0	High durability and quick defoaming performance Dispersible in water High efficiency- low usage levels
PLUS DF-85	Defoaming agent	8,0 - 9,0	Multi purpose defoaming agent Very effective used Silicone based antifoam
